

Student for IT Security Company in the centre of Copenhagen

Do you want to join our cutting-edge Managed Detection and Response (MDR) Team, and learn from your skilled and dedicated colleagues? We examine devices that have been compromised by malware or malicious hackers for our customers – and you will help us make a difference!

Our MDR-team is one of CSIS's key areas, and we are growing! Our MDR specialists run a 24/7/365 operation securing our clients by monitoring, responding, and classifying alerts raised from our IT systems. As our new student assistant, you will examine devices that have been compromised by malware or malicious hackers for our customers.

You will become part of a team of 16 skilled colleagues, including 5-6 different nationalities. Your new colleagues are curious about learning new things, great at collaborating within the team and across the organisation, and they enjoy socializing.

As a Security Analyst Student, you will work primarily evenings, weekends, and holidays. Shifts can vary in length, from 5 to 12 hours. Students book their own shifts on an ongoing basis, but you should be available to work an average of 15-20 hours per week.

Your new job

We are looking for 2 new students, and we will have 3 in total in the team. We will make sure that you are onboarded and prepared for the role, and you will achieve skills that are valuable for your future career, which may be with us. Many of our student assistants stay with us once they graduate. You will gain in-depth working knowledge of: IT Security monitoring, SIEM, IDS/IPS systems, Windows Forensics, Incident handling and IT security in general. Your primary responsibilities will be:

- Triaging Alerts
- Monitoring security events from multiple data sources, providing analysis and concrete recommendations to our customers

- Performing forensic investigations of systems, that are potentially affected by malware
- Act as first line support with incident response assignments (24/7 assistance on phone and mail)
- Fine tuning of detection rules to increase the true positive alert ratio

About you

is important for us, that you are engaged in what you do, and that you want to learn. You ideally have 1-2 years left of your studies, and you can tick off many of the following:

- Are proficient in Windows and Linux
- Have basic knowledge of networking devices (routers, switches, firewall/IDS/IPS)
- Have basic knowledge of the TCP/IP stack
- Have basic programming skills
- Have basic knowledge of SIEM or EDR tools
- Possess a high degree of self-motivation
- Have a good analytic mindset
- Have an eye for detail and ensure consistent high quality in your work
- Have good verbal and written English communication skills
- Are a good team player

Student for IT Security Company in the centre of Copenhagen

What we offer

When you join CSIS, you will get an interesting job with great possibilities for learning and building the foundation for your next career steps. You will get interesting challenges, that truly make a difference for our customers, and you will be able to take ownership for your work from start to finish. You will be working and collaborating with more than 70 fantastic colleagues from all over the world.

Besides that, you will get:

- An interesting and challenging work in a financially independent company
- A strong team of IT security focused specialists around you
- The possibility to become a fulltime employee after your graduation
- A competitive salary and personal benefits package
- Healthy, varied lunches (incl. vegetarian and allergy options)
- Stocked refrigerators with soft drinks and organic fruit juices
- Lots of social activities and company events

Practical

- The student position is paid on an hourly basis, approximately 15-20 hours per week, and it is available immediately.
- The workplace is in Vestergade near Strøget in the centre of Copenhagen, Denmark.
- It is a requirement that you can show and uphold a clean criminal record.

Contact

- To apply for this position, please send your CV and a motivated application to hr@csis.dk
- If you have questions about the role contact Teamlead Simon Jonker at +45 20 90 33 04, or Teamlead Marco Frydshou at +45 31 26 26 19 Monday-Friday between the hours of 10:00-14:00.

About CSIS

Founded in 2003, CSIS Security Group A/S (CSIS) is a leading provider of advanced cybersecurity capabilities, focused on actionable and intelligence-driven detection and response services. We are the preferred cybersecurity partner to notable organizations across various sectors, including Banking & Financial Services, Energy & Utilities, Manufacturing, Transportation & Logistics as well as Government & Public Sector. We are a trusted adviser to law enforcement agencies (including the FBI, NCA, Europol) and are also sought-after speakers for public and closed-community conferences around the world. Additionally, our depth of expertise and distinguished reputation ensure that we are regularly called upon as expert commentators on cyber topics for the media.
